

1. Remove the bumper from the car.

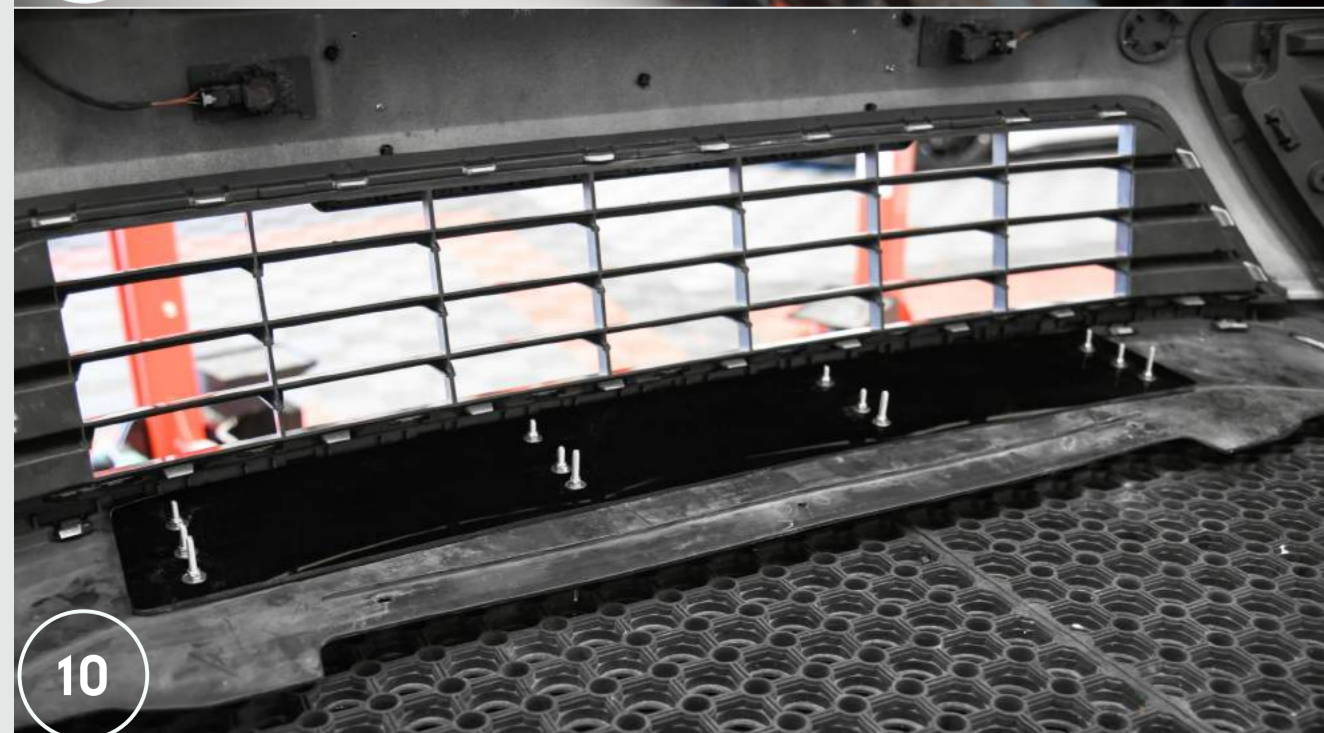

2. Prepare the bumper, splitter, reinforcing insert and assembly kit with the necessary tools.

3. Align the splitter with the bumper.

4. Use screws to attach the splitter to the bumper on both extreme sides.

5. Place the reinforcing insert on the inner part of the bumper.

6. Drill through the original holes in the splitter to open through the bumper and the reinforcing insert.

7. Insert the bolts into the drilled holes. Remove the screws securing the splitter to the bumper.

8. Put washers and nuts on the bolts from the inner side of the bumper.

9. Tighten the bolts tightly.

10. The mounting bolts should be in each hole marked on the splitter - a total of 18 bolts.

11. Assemble the bumper to the car.
